

Patient Positioning:	<input type="checkbox"/>
Ear-to-Sternal Notch (to optimize the visualization of the cords)	<input type="checkbox"/>
Document other alternative positioning	<input type="checkbox"/>

POGO Score (Percent of Glottic Opening):	<input type="checkbox"/>
	<input type="checkbox"/>

Bougie (Use on First Pass as outlined in the MEMS Protocol Pearls):	<input type="checkbox"/>
“Tracheal-Tap” (vibration of bougie tip felt running over tracheal rings)	<input type="checkbox"/>
“Hold-up Sign” (resistance of carina when bougie is gently buried)	<input type="checkbox"/>

Number of Attempts:	<input type="checkbox"/>
An intubation attempt is defined as a bougie or the endotracheal tube past the teeth or inserted into the nasal passage	<input type="checkbox"/>

Endotracheal Tube Size:	<input type="checkbox"/>
-------------------------	--------------------------

Depth of Endotracheal Tube at Teeth/Gums:	<input type="checkbox"/>
---	--------------------------

Airway Difficulties or Challenges:	<input type="checkbox"/>
Clearing of Secretions (blood, emesis, etc.)	<input type="checkbox"/>
Equipment Failures	<input type="checkbox"/>
Miscellaneous Details	<input type="checkbox"/>

Neck Stabilization After Intubation (Protection of Airway Placement)	<input type="checkbox"/>
Cervical Collar or Blankets	<input type="checkbox"/>

Endotracheal Tube Placement Confirmation	<input type="checkbox"/>
Waveform EtCO <sub>2</sub> , Lung Sounds, Chest Rise, Negative Epigastric Sounds	<input type="checkbox"/>

Ventilation Rate After Endotracheal Intubation	<input type="checkbox"/>
--	--------------------------

Advanced Airway Placement Reassessment After Each Patient Move	<input type="checkbox"/>
Waveform EtCO <sub>2</sub> , Lung Sounds, Chest Rise, Negative Epigastric Sounds	<input type="checkbox"/>
